Your entire team can set it up quickly Read more FAQand TroubleshootingChangeand Troubleshooting© Doist Inc.CeštinaDansDeutschEnglishEspañolSomriFrançaisitaliano日本語ItalyNorsknederlandspolskiPortugu 1.1 (Brazil)Русски (Russian)Svenskaturkçe中文 (简体) 中文 (Sylvan體) using TodoistAndroid and iOSLogin Features to give feedback on this article. SecurityPrivacyTerms© Doist Inc.CeštinaDansDeutschEnglishEspañolSomriFrançaisitaliano日本語Nor and Novlandsaiskportogowais (Brazil)Русски (Russian)SvenskaTurkçue中文 (简体) 中文 (and Beck體) is the third party minimum and lightweight piece for Todoist. Microsoft to do and Google Calendar.Stay tasks by constantly reminding of your most important tasks. ready to check the moment they are finished. Avoid having to open your tasks app whenever your to-do list needs a quick update. The widgets included allow you: - View your full todo list.- Add new tasks.- Complete and delete tasks.- Update and edit content and due date of existing tasks.- Use vital due dates while you enter your to do.- Open the official app from within the same widget. Note that this is limited to supported Todoist views. All for free, with no ads.Common keywords will work when adding tasks, such as: - priority (ex 'p2' or 'p3') - keyword history (previous 'tomorrow' or '13:00') setup instructions:- Install the app like normal.- Open the app Click to todoist, Do or Google Calendar at the top.- Fill in your login details as you would on the relevant websites (using official secure APIs).- Press long on the home screen to add a new widget, then scroll down to the tools available within the app Clear (not todoist application). Get a clear Pro as a way to support development. As thank you, you will also get access to 2 additional bonus widgets. View Applications that use a more traditional calendar design, or as a weekly overview. Please note that all the obvious basic features will always remain free, and Scan Pro is first and foremost a way to support development and increase the frequency of new updates. Also note that Clear is still in the demo version, and as such some errors cannot be avoided. As this project is an ongoing process, we expect new improvements and features to be added frequently. If you have a problem or suggestion, don't be afraid to send me a message through the feedback option in the app! While Clear has a lot of the same functions, it is not a complete replacement for Todoist's main applications or To Do. It is intended to be a quick overview of upcoming tasks and projects, readily available in the aesthetically widget, and works best alongside official applications. If you want more details about development or need a place to leave feedback, please check the subreddit app:
